

PERCH NMR software course

13.-14.10.2008

- Processing
- Quantification
- Molecular Modeling
- Proton Prediction
- Spectral Analysis

Now you have a perfect opportunity to learn to use the professional NMR software to analyse your spectra. The two-day course will present the capabilities and use of PERCH NMR software by means of lectures and hands-on tutorials. If you would like to have some specific topics covered, please contact Matthias (see additional info). You can also bring your own spectra with you to be analysed during the course.

The course will be held at CSC in Espoo 13.-14.10. and will be given by *Matthias Niemitz* and organised by PERCH Solutions Ltd. and CSC - Finnish IT Center for Science.

The course is free of charge for academics.
