

SCIENTIFIC APPLICATION ENVIRONMENTS

- Lemmie – Corpus Query Interface
- Digital Morphology Archives – DMA
- SOMA2 – Molecular Modeling
- PalTuli – Geospatial Data

GET MORE BY PARTICIPATING

Participation gives you more benefits! For example, use the discussion forum as a quick way to find information, ask questions or to give feedback to developers. You can also suggest new services or ideas to the developers and other community members.

MORE TO COME

Development of the Scientist's User Interface portal will also continue actively in the future.

CSC will provide new services for you to use via SUI. In particular, CSC's eServices will be improved in general. Currently SUI offers an account and resource application for linguistics provided by the Language Bank Rights. This is a first step towards a common approach, which allows you to easily get access to CSC's services.

HOW TO ACCESS IT

SUI is easily accessible in <https://sui.csc.fi>. To sign in use you can use HAKA authentication provided by your home organization or by using your existing CSC user account. Full service offering is available for those users who have CSC user account.

SUI IS OPEN SOURCE BASED DEVELOPMENT

- Liferay portal platform
- Vaadin web application framework
