

The European Standards Organization Workshop on Functional Multilingual Extensions to European Keyboard Layouts (CEN/ISSS WS/MEEK) has formed its Project Team consisting of the following persons:

Troy Korjuslommi
Karl Pentzlin
Michael Pluke
Maria Stambolieva

The Workshop will prepare a single-part CWA (CEN Workshop Agreement) covering at least the following areas:

- a list of aspects to be taken into consideration when designing regional multilingual keyboards and related input methods (both technical, legal and relating to usability);
- specific recommendation and guidance related to the above aspects;
- considerations and possibly guidance for publicly available terminals, e.g. in Internet cafés, for travellers, etc.

The Workshop will not define any national or language-specific keyboard layouts. Some such layouts may be used as examples. The CWA is expected to be published in early 2009.
