

FLOATING LICENSE AGREEMENT

for the *Accelrys software packages* between
CSC – Center for Scientific Computing Ltd. and

(academic organization and mail address)

Dated: _____

An agreement made between the academic organization and CSC relates to the *Accelrys software packages* (Materials Studio Modeling, and Discovery Studio) and their usage within the licensing agreement between Accelrys Inc. and CSC. The academic organization is licensed to use these *Accelrys software packages* with the floating license provided by CSC, according to following conditions:

1. The organization warrants that it is an academic organization and that *Accelrys software* will be used exclusively for the purpose of scientific teaching and research. The results of such research must be published through normal academic channels, subject to the inclusion of a proper acknowledgment to CSC and Accelrys.
2. The organization shall be responsible for ensuring that all persons permitted by the organization to have access to the *Accelrys software* shall comply with the conditions of this agreement. The software shall not be used in conjunction with any consulting or joint project with any non-academic organization without a prior written permission of CSC.
3. The organization is supposed to be capable of installing and testing the programs with the instructions given by CSC and Accelrys.
4. CSC provides the organization with a valid floating license file that works under the license server running at CSC. CSC reserves the right to discontinue the

floating license availability in case of computer reconfigurations, software installations or other temporary reasons. CSC also reserves the right to follow and regulate the usage of the license tokens and *Accelrys software*.

5. If the organization uses other products (like other Accelrys modules than those licensed by CSC) the organization is responsible for checking the compatibility of these with the Accelrys floating licenses before installation. CSC is not responsible for any problems caused by installation failures or product incompatibility.
6. Support requests should be primarily addressed to CSC but the members of the academic organization are also allowed to contact the Accelrys support channels provided that they clearly state that they are using CSC's floating license.
7. The organization has to select a person from its permanent staff who by his/her signature agrees that the organization accepts the terms in this agreement.
8. This agreement is renewed automatically in the end of each year unless CSC, Accelrys or the academic organization cancels the agreement. The person selected by the organization is responsible for communicating to CSC any changes in the use of the program or its possible termination.
