

Academic User Registration Form for Access to Genomatix Software Suite

CSC – IT Center for Science Ltd. has purchased one national floating license to Genomatix Software Suite (including modules Bibliosphere and Region Miner) for the period 1.12.2011 - 30.11.2012. This licensing allows one academic researcher to use Genomatix Software Suite at a time, provided that the user has obtained a personal Genomatix Software Suite user account through CSC. This registration form allows the research group leader to obtain user accounts for members of his/her group under CSC’s licensing by paying a user fee. The following conditions apply:

1. The group leader is a full-time staff member or directs a laboratory in an academic institution in Finland. A user is an academic employee or student, and Genomatix Software Suite will be used only for academic research.
2. The group leader designates Genomatix Software Suite users from his/her group. For each user, the research group pays CSC a user fee of 1250€ (excluding taxes). The user fee gives access to Genomatix Software Suite until the end of November 2012.
3. The group leader ensures that his/her designated users accept the Genomatix Online License Agreement (https://extras.csc.fi/biosciences/courses/genomatix/AppendixI_GenomatixOnlineLicenseAgreement.pdf), where the individual user is referred to as Licensee. It is particularly important to notice that
 - user accounts are personal and sharing passwords is not allowed,
 - certain restrictions apply to publication of results obtained with Genomatix Software Suite.
 Illegal use can cause all CSC’s licenses to be terminated immediately without refund. The group leader ensures that his/her designated users comply with the terms of usage, and is liable for any economic losses caused by the illegal use of Genomatix Software Suite to Genomatix, CSC and other groups using CSC’s licensing.
4. CSC pays the licensing costs to Genomatix and administrates the opening of user accounts. New users can be added during the licensing period. As the number of users increases, CSC will obtain more licenses so that there are never more than ten users per license. CSC reserves the right to balance the simultaneous usage between the groups if necessary.
5. Genomatix provides user support by telephone and e-mail during regular business hours.
6. The group leader and the designated users agree that CSC can obtain access logs from Genomatix. Users agree to report to CSC any interruptions in the Genomatix software Suite service. Should Genomatix not be able to provide the service for three consecutive days, the total number of days of outage will be appended to the license period. Should the interruption last more than ten days, CSC has the right to terminate the licenses. In that case the research group will get a refund for the user fees paid, based on the remaining time in months.
7. All changes in group leader and user information given below need to be reported to CSC immediately.

Group leader information:

Name:	
Position:	
Institution:	
Department and laboratory:	
Street address or P.O. Box:	Postal code and city:
Phone:	Fax:
E-mail address:	
Billing address and reference number:	

_____ Place and date

_____ Signature of the group leader

The following page 2 contains information about individual users in the group and their signatures.
