

RESEARCH DATA ALLIANCE

RDA Europe 4.0: Plannig of Finnish Node Activities

10 October 2017

RDA Europe 4.0

- **need for the open and interoperable sharing of research data, and the need to build social and technical and cross-disciplinary links to enable this sharing on a global scale**
- **community-driven and bottom-up approach launched in 2012.**
- **how the EU can contribute to implementing an effective **governance model and strategy** within RDA global that ensures RDA delivers on locally relevant issues**
- **new, open and dynamic structure to expand the RDA community in Europe.** It builds on existing networks to create a **European network of nodes** to enhance member state cooperation and support of RDA in many European countries by 2020, enhancing EU competitiveness and EU leadership within RDA Global.

RDA Europe 4.0

9 specific objectives:

1. **Becoming the Centrepiece for an EU Open Science Strategy** through consolidated EU nodes;
2. **Providing the skilled, voluntary resources from the EU investment** to address Digital Single Market (DSM) issues;
3. **Facilitating cross-disciplinary & multi-disciplinary research;**
4. **Building, strengthening, and consolidating an RDA global community;**
5. **Contributing to global interoperable data infrastructure;**
6. **Democratising access to funding opportunities** in data infrastructures & interoperability;
7. Driving the process of **RDA ICT Technical Specifications** in Europe;
8. Developing a **sustainable path for the RDA in Europe;**
9. Bringing forward the **RDA legacy in Europe.**

A 27 month project (start 1 March 2018) with a clear set of strategic objectives & specific outputs building on the previous phases, the RDA legacy & its community-driven and bottom-up approach launched in 2012.

RDA Europe 4.0 Consortium made up of 5 beneficiaries & 9 third parties.

Initial RDA EU National nodes onboarded

Potential RDA EU National nodes to be onboarded

It builds on existing networks to create a **European network of nodes** to enhance member state cooperation and support of RDA in many European countries by 2020, enhancing EU competitiveness and EU leadership within RDA Global.

Nodes & Activities going forward

Nodes should act as the **central contact point between the national / regional data practitioners and RDA**, through the following activities:

- Creation, organisation and management of **a national / regional RDA community**;
- Participation in and representation on the RDA Europe Governing Board (as defined in section 3.2);
- Interaction with **national research funding bodies and RDA governance**;
- **Promotion of open calls** for European participation in RDA (plenary meetings, support programmes, ambassadors, early career programmes, etc.);
- Identification of **strategic themes and domains** as focus of European cascading grants / open calls;
- **Organisation of events** (meetings, workshops, training courses etc.) to disseminate & promote RDA activities and outputs;
- Dissemination of RDA activities and output and **encouraging participation in RDA activities and adoption of outputs**, leveraging on the knowledge of the local research system.

A network of national and regional “nodes” is an essential and fundamental component of the growth, consolidation and sustainability of RDA in Europe (RDA EU3 Informal Review).

RDAEU Pains & Gains of Finnish participation

- 1st phase: identification of pains & gains
 - One topic per post-it
 - Write down ALL the thoughts you come up with the topic: min. 1 positive and 1 negative
 - Do not hold back!

- 2nd phase: discussion and finding the new ideas

- 3rd phase: integrating the new ideas to RDA 4.0 Finnish Node activity plan

Thank you!
