

Intelligent services are arranged around life events

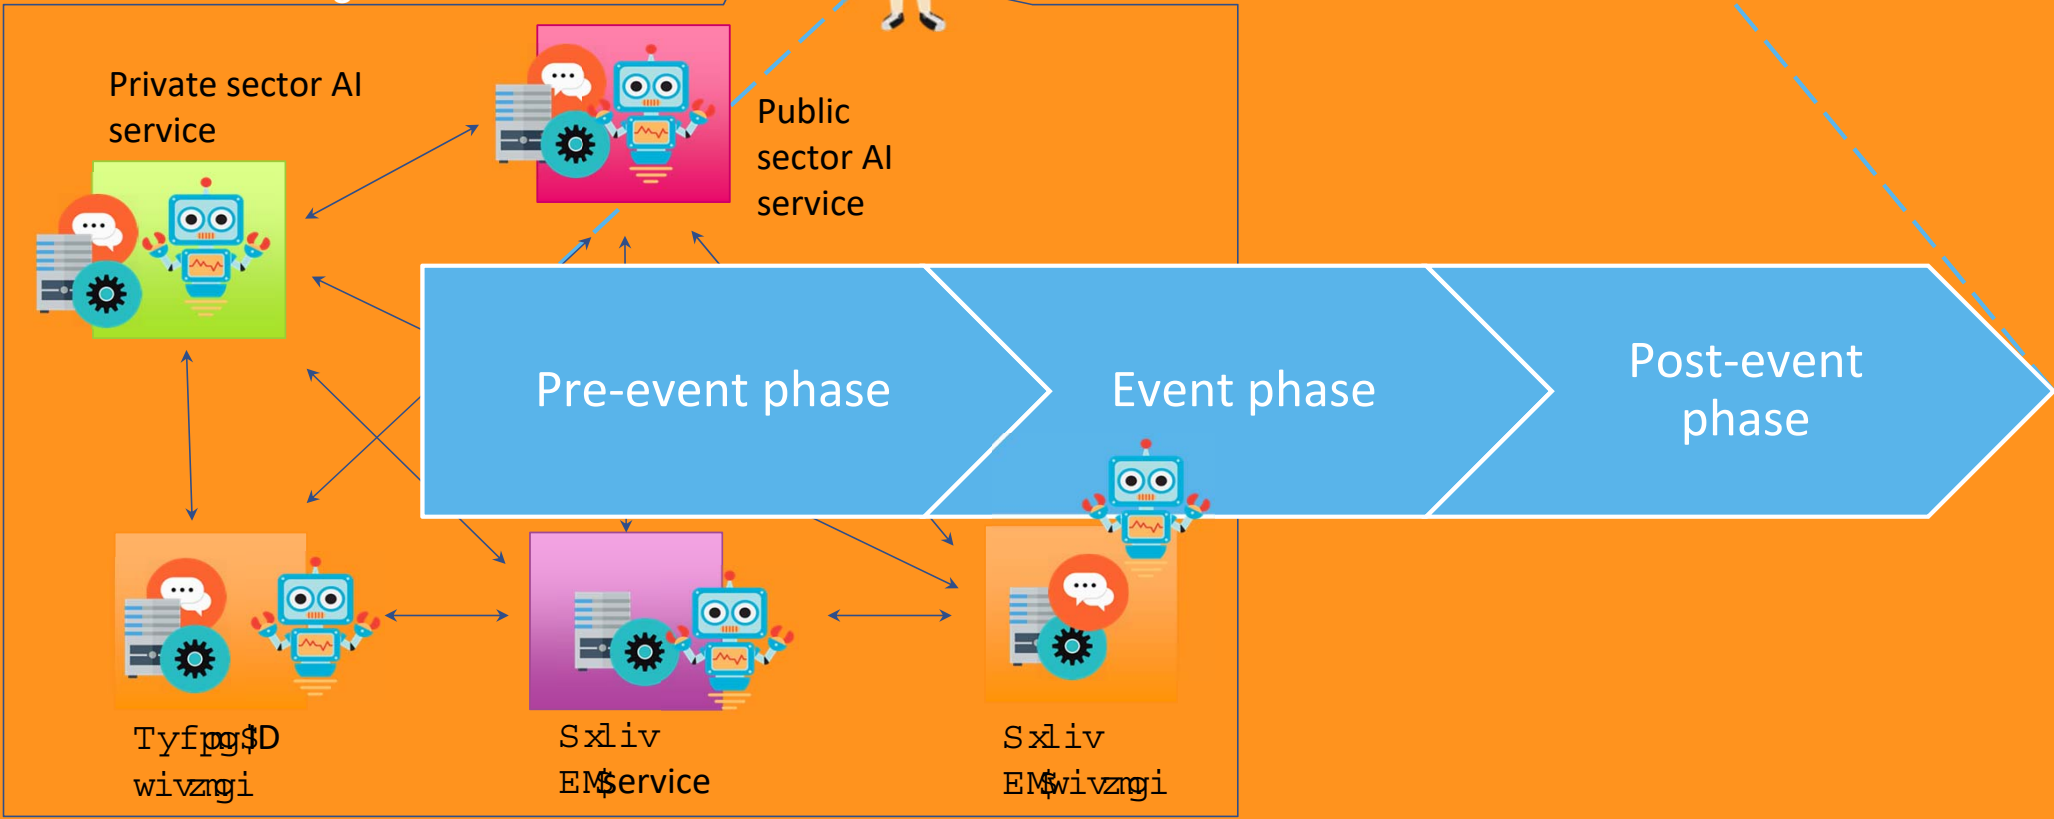

I will help you exploit my data and other data to enable personalized services

Aurora

Engage in working life through lifelong learning

Network of intelligent services

#AuroraAI – status 09/2018

Prepare the National Implementation Plan 2019-2022 for #AuroraAI, deadline 12/2018
(Ministry of Finance)

- Goals
- Key outcomes, measures, cost-benefit calculations, timetables, roles and responsibilities
- Productivity and customer benefits
- Creating a basis for the possible artificial intelligence goals of the next government program

Co-operating also with

- The Social Insurance Institution of Finland (Kela)
- Tax Administration
- ...

Life-events

1. **Moving to another city to study** (City of Tampere + Council of Tampere Region + City of Turku + Regional Council of Southwest Finland)
2. **Engage in working life through lifelong learning** (Finnish National Agency for Education + Ministry of Education and Culture + Ministry of Economic Affairs and Employment of Finland)
3. **The well-being of children and parents in changing family relationships** (Ministry of Social Affairs and Health + Ministry of Justice Finland)

Co-operation

The common technology required by the Aurora network

(Finnish Immigration Service + Population Register Centre)

1. **Distributed network of artificial intelligence**, where intelligent applications with different degrees of maturity cooperate with the customer
2. **A digital twin to help evaluate one's own well-being** and get the service they want in different service ecosystems
