Second look at shell - exercise

Prerequisite

- Where am I

    > `pwd`

    > `hostname`

- Check contents

    > `ls -l`

- Make symbolic link

    > `ln -s dir/file.sh file_link.sh`

- Adding permissions

    > `chmod u+x file.sh`

Exercise

Write a 'hello world' script "hello.sh" on your workstation or in Hippu. Make it executable and check that it works.
The expected behavior is given below:

```
>./hello.sh
Hello world!
>
```

2) Create folder called "hello_world". Copy script "hello.sh" to the folder "hello_world". Compress the folder with tar and copy it to Taito using scp or rsync.

3) Connect to Taito using ssh command. Uncompress the folder "hello_world" and run "hello.sh" script on Taito.
