

Cheat sheet for the hands-on exercises for Schrödinger Maestro Workshop

1 Log on to Linux

username **cscuser** (password behind you)

2 Open a terminal

right click at the background, select “terminal”

3 Download the hands-on instruction files

Navigate to the workshop home page (<https://www.csc.fi/en/web/training/-/maestro-2019>), scroll down, open the “materials” tab, select the right day, and save it.

4 Unpack the hands-on files

In the terminal, change to the folder where you downloaded the file (perhaps **cd Downloads**) and:

```
unzip Day_1.zip
```

5 Initialize Maestro

write the following in command line prompt in the terminal:

```
source ~/setup-maestro.bash
```

and press enter.

6 Start Maestro

write **maestro** in the command line
